Double Patenting

1. Applicant is advised that should claim 1 be found allowable, claim 2 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23 are drawn to an apparatus which directed towards a collaboration of multiparty terms and condition negotiations negotiation classified in class 705 subclass 80.
 - II. Claims 24-28 are drawn to an apparatus which is directed towards a server system for online electronic shopping, particularly directed towards purchasing automobile, classified in class 705subclass 26.
 - III. Claims 29-41 are drawn to a method of data presentation and management in a database utilizing dynamically generated interface (i.e. Web page, or GUI) classified in class 705 subclass 1.
 - 2. Inventions I, II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case data management which can be separate from other inventions.
- 3. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

Application/Control Number: 09/898,896

Art Unit: 3621

In the instant case, invention I has separate utility such as a rule and contract negotiation management tool. Invention II has separate utility such as servers that are utilized to conduct commercial transaction. Invention III has separate utility such as data management method using dynamically generated interface. See MPEP § 806.05(d).

Inventions III and I are not related. In the instance case, invention I, an apparatus, has separate utility such as a rule and contract negotiation management tool. Invention III, apparatus, has separate utility such as data management method using dynamically generated interface.

Invention II and III are not related. In the instance case, invention II, an apparatus, has separate utility such as servers that are utilized to conduct commercial transaction. Invention III, apparatus, has separate utility such as data management method using dynamically generated interface.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated are proper.
